

# DBMS NOTES

Narale Arjun

## **DataBase Management System (DBMS)**

=====

**Day 01 :**

**Syllabus :**

**1. ER-Module**

**2. Introduction To SQL**

**ER-Module :**  
**Entry\_Relationship Diagram**

**DBA Developer**

analyse

**Manual Database Information**

Pictorial representation

**ER-Module**

**SEQUAL (english query language)**

**sql**

**E.F.chodd**

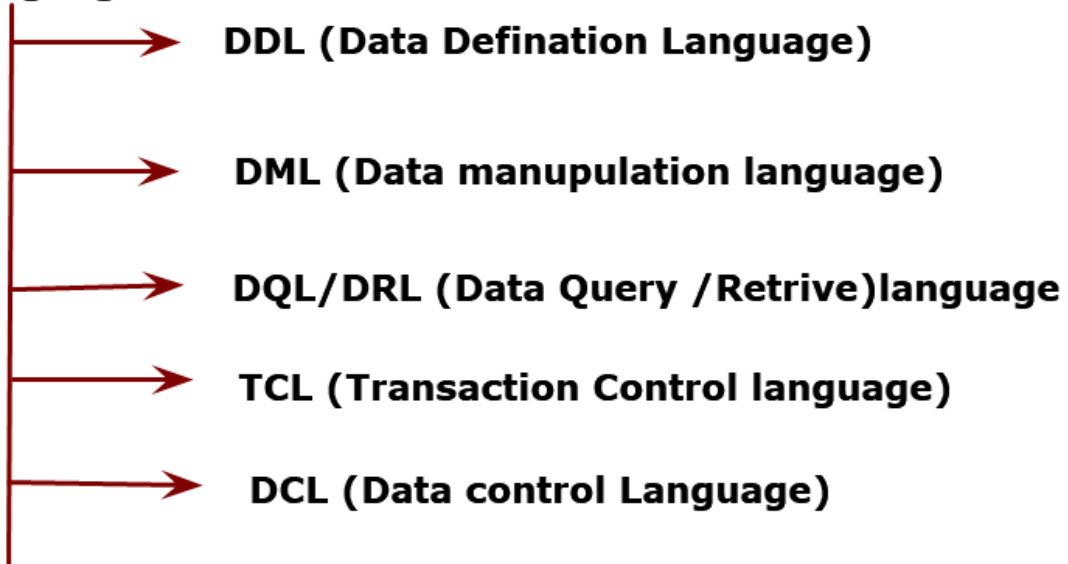

**1970**

**1972**

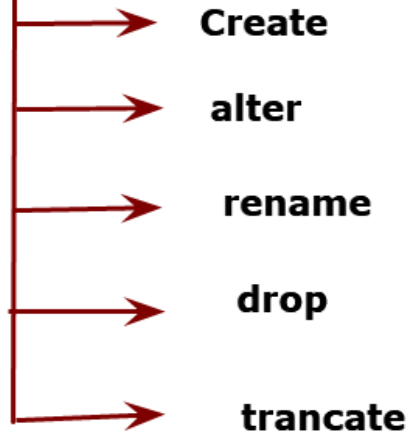

**relesed note**

**Sub languages :**

## **Sunlanguages comands :**

### **1.DDL :**

### **2.DML :**

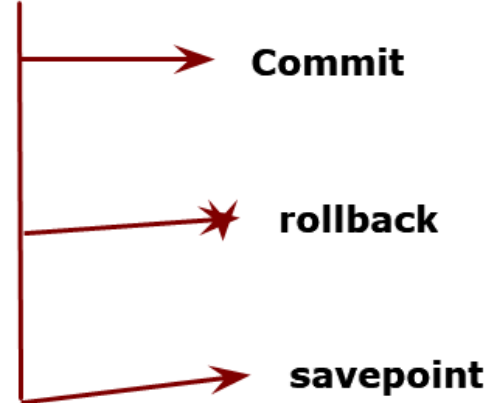

### **3.DQL :**

### **5.DCL:**

### **4.TCL:**

**When we are Design ER-module ,use following Symbols:**

**1.Rectangle : Represent TableName / Entry name**

**2.Oval : Represent column name of Table**

**3.Diamond: Relationship Between Tables /connecting to table**

# RohoTech Programming Classes

Day 02 : 22/09/021

---

DDL : Data Definition Language :

1. Create
  2. Alter
  3. Rename
  4. Truncate
  5. Drop
- 

1. CREATE

Syntax :

1. Creating database :

```
create database [database-name ];
```

Eg.

```
create database roho;
```

2. Create Table :

syntax :

```
create table [table_name](column1,column2..... );
```

```
create table college(name char(100),password int(100));
```

## 2. Alter :

Syntax :

```
alter table [old_table_name] to [new_table_name];
```

eg.

```
alter table college to university;
```

---

Column alter :

syntax:

```
alter table [table_name] change [old_column_name] [new_column_name] [datatype ](size);
```

eg.

```
alter table university change name student_name char(100);
```

---

## 3. Rename :

Syntax:

```
rename table [old_table_name] to [new_table_name];
```

eg:

```
rename table university to college;
```

---

## 4. Truncate :

Syntax :

```
truncate table [table_name];
```

eg:

```
truncate table college ;
```

---

## 5.Drop :

syntax:

```
drop table [table_name];
```

eg.

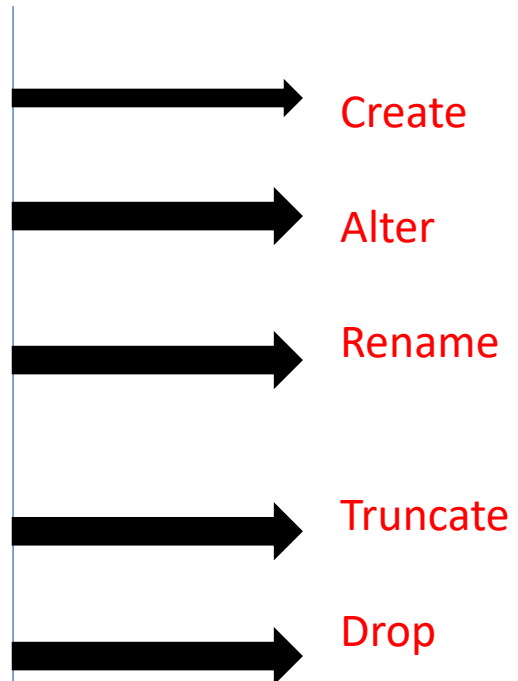

```
drop table college;
```

=====

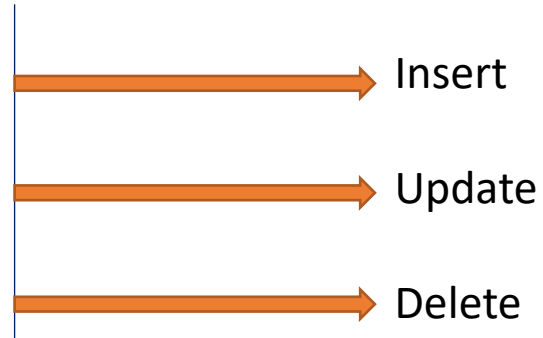

# Homework

roho

Username	password	PRN	Mobile_Number

# DML : Data Manipulation Language

=====

## 1.INSERT

Insert command is used for insert a new row into table

Syntax :

```
insert into [table_name](column_names)values(value1,value2);
```

Eg.

```
insert into roho(username,password)values('arjun',1234);
```

=====

## 2.Update :

Syntax :

update [table\_name] set [counmn\_name1 =value].....[column\_names =values]

Eg.

1.update college set username ='Saniya';

2.update college set password =4567;

3.update college set mobile\_number =+91.....;

---

## Delete:

Syntax :

delete from [table\_name] where (condition);

Eg.

1.delete from college where username='arjun';

2.delete from college where password=12345;

---

# HomeWork :

## 1.Read Write Revise DML
